## **DETAILED ACTION**

## Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 51, 52; 15-22, 53; 41-46; and 56-57, drawn to a rack mountable device for a rack mount computing system; a user interaction device mountable in a rack computer assembly; a method for forming a rack mountable keyboard and display assembly; and a user interaction assembly mountable in a rack computer system, respectively, classified in class 361, subclass 683.
- II. Claims 23-32, 54, 55; and 33-40, drawn to a rack mount computing system and a method for rack mounting a keyboard and a display in a rack mount computer system, respectively, classified in class 211, subclass 26.
- III. Claims 47-50; and 58-59, drawn to a method of operating a rack mounted keyboard and display assembly; and a rack computer system, respectively, classified in class 312, subclass 223.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination, i.e., the combination is positively claiming both a user interaction assembly and a rack while the subcombination is positively claiming the user interaction assembly and functionally reciting a rack and hence only requiring the particulars of the user interaction assembly and not the rack. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the particulars of a trackball. The subcombination has separate utility such as use without a rack mount computing system.

Page 3

Inventions III and I are related as combination and subcombination, i.e., the combination is positively claiming both a user interaction assembly and a rack while the subcombination is positively claiming the user interaction assembly and functionally reciting a rack and hence only requiring the particulars of the user interaction assembly and not the rack. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the particulars of the dimensions of the keyboard and display assembly. The subcombination has separate utility such as use without a rack mount computing system.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as use without the specific dimensions of the display and input device. See MPEP § 806.05(d).

Art Unit: 3634

12 to 24 to 141 1 1 1

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer E. Novosad whose telephone number is (703)-305-2872. The examiner can normally be reached on Monday-Thursday, 5:30am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl D. Friedman can be reached on (703)-308-0839. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
